Marie “Queen” Spiller was determined to be a winner. She was no ordinary hood chick. She wanted to get out of the hood and never become a statistic. But growing up in Avondale, a neighborhood in Cincinnati, Ohio wasn't the kind of area people “made it” out of. Once Queen falls in love with a local drug dealer she thinks she has it all. She thought she finally found happiness, but once he commits a crime that lands him in prison she loses everything. Queen is forced to move outside her city in order to forget about the one place she calls home. Besides her family and friends something is keeping her from forgetting her past, so she returns to Cincinnati. To her surprise the city didn't forget how and why she left. With her enemies trying to knock her out the game it seems she can't win for losing. Friends betrayed her, men hurt her, and the one person she hates the most ends up saving her in the end. Does Queen finally find happiness? In the end will Queen finally get her King, or will she be the only one left on the chess board? Will she finally get her fairytale and end the game with a CHECK MATE or will she be out the game forever?
